

INFORMATION FOR PATIENTS

Spirometry with reversibility to inhalers

Your doctor has requested that we perform a test on your breathing to help guide your medical treatment.

What is a spirometry test?

Spirometry measures how well your lungs are working. Doctors commonly request this test to:

- See if you have any lung disease.
- To measure the severity of lung disease.
- To see if medication will make your breathing better.
- To test your lung function before an operation.

The procedure

You will be asked to breathe in and out of the machine, sometimes deeply and then to blow out as quickly and as long as possible. You will be seated during the test.

This test will be performed a minimum of three times, and you will be given a rest between each attempt.

The test may then be repeated after we have given you some respiratory medication, to see if this helps your breathing.

The doctor may also wish us to take a small sample of blood from your earlobe to measure your oxygen levels.

Please bring with you a list of your current medications.

Before the test

Before attending for your spirometry test, please:

- Do not do any vigorous exercise for 30 minutes.
- Do not wear any tight clothing that may restrict your breathing.
- Do not smoke for at least one hour.
- Avoid eating a heavy meal or drinks containing caffeine for two hours.
- Do not drink any alcohol for four hours.

If you use inhalers, nebulisers or take tablets for your breathing, **please try not to take the following:**

36 hours before tests:

- Spiriva
- Braltus
- Spiolto
- Incruse Ellipta
- Anoro Ellipta
- Trelegy Ellipta
- Trimbow
- Enerzair
- Seebri
- Relvar
- Onbrez Breezhaler
- Atecura
- Breo Ellipta.

24 hours before tests:

- Fostair / Luforbec (pink one)
- Symbicort
- Duoresp Spiromax
- Flutiform
- Serevent

- Seretide
- Oxis Turbuhaler.

12 hours before tests:

- Atrovent.

4 hours before tests:

- Salbutamol/ Salamol/ Ventolin/ Easyhaler/ Easi-breathe (blue one)
- Bricanyl (blue one).

If you feel you are too breathless without any of these then you must take them.

If you are taking any inhaled medications or allergy medications that are not listed above, please contact the department as soon as possible in order to discuss whether they need to be stopped.

Please continue to take all other prescribed medication as normal.

Please contact the department if you have experienced any of the following:

- Current or recent chest infection (within the last two weeks).
- Recent eye, stomach or chest surgery.
- A heart attack within the last month.
- Have attended an Emergency Department in the last two to three days.
- Chest pain on the day of your test.

Please allow 90 minutes for this appointment.

Results

The results will go to your doctor who will explain them to you at your next clinic visit.

Please note that you may not be given the results on the day of your test.

What if I need hospital transport?

You will need to arrange transport by telephoning the following numbers between 7am and 9pm, Monday to Saturday (please use the number for the area you live):

- Nottinghamshire: 0345 266 9662

- Derbyshire: 0300 300 3434
- Lincolnshire: 0848 357 1556.
